An International Multidisciplinary Research Journal

ISSN (online) : 2249 –7137

Editor-in-Chief : Dr. B.S. Rai

Impact Factor : SJIF = 5.099

Frequency : Monthly

Country : India

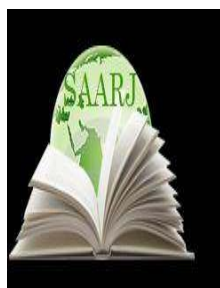

Language : English

Start Year : 2011

Indexed/ Abstracted : Ulrich's Periodicals Directory, ProQuest, U.S.A.  
EBSCO Discovery, Summon(ProQuest),  
Google Scholar, CNKI Scholar, ISRA-JIF, GIF, IJIF

E-mail id: [academicia@saarj.com](mailto:academicia@saarj.com)**VISION**

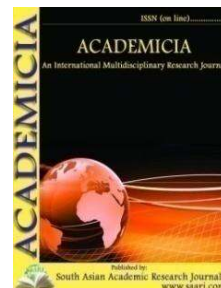

The vision of the journals is to provide an academic platform to scholars all over the world to publish their novel, original, empirical and high quality research work. It propose to encourage research relating to latest trends and practices in international business, finance, banking, service marketing, human resource management, corporate governance, social responsibility and emerging paradigms in allied areas of management including social sciences , education and information & technology. It intends to reach the researcher's with plethora of knowledge to generate a pool of research content and propose problem solving models to address the current and emerging issues at the national and international level. Further, it aims to share and disseminate the empirical research findings with academia, industry, policy makers, and consultants with an approach to incorporate the research recommendations for the benefit of one and all.

### ABSTRACT

*Mergers and Acquisitions (M&A) holds a major role in corporate restructuring and growth of companies in the post-globalisation era. 'Most Mergers Fail' despite all efforts to make it successful. This study intends to study what all factors should be considered by Organisations while drafting the M&A proposal. Initially, it is studied why majority of the mergers fail as it may help policy makers to take of CSFs while drafting M&A proposals. Seven CSFs were suggested for consideration while drafting M&A proposals. The study ends with recommendations based on the study for successful M&A proposals.*

**KEYWORDS:** *Mergers and Acquisitions (M&A), Critical Success Factors (CSF), Acquisition purchase premiums (APP), Merger wave, Value Gap (VG).*

#### ABSTRACT

*“Statistics is a supportive subject most of the academic disciplines in that statistical thought are needed at every stage of virtually all research investigations including planning the study, sample selection, managing the data, and interpreting the results”. The data set contains large in the sense with lakes of records and thousands of variables, these situations the statistician has to use software like SPSS,SAS,SYSTAT, RATS,R-Software etc., So here we are proving power SAS for analysis and drawn inference accordingly. Time series data can have outliers, structural changes, and calendar effects. In the past, found a good model for time series data usually required experience and expertise in time series analysis.*

**KEYWORDS:** *Disciplines, Inference, Statistics, Variables,*

### ABSTRACT

*Agambadi is one of the backward community among the Tamil Nadu Communities now a days they are mostly live in Ramanathapuram, Sivagangai, Viruthunagar and Madurai districts in Tamil Nadu. Marudu brothers were one of the members in this Community when there was trouble in political in Sivagangai, these brothers turned as leaders of people and safe guarded their dignity. The period between AD 1780-1801 was seemed that Battle against British. They administered the government well among many problems. They accompanished economy, art and literature work. They were not only good heroes but good rulers and patriotic. Giving importance to some leaders is seen in Indian history. Some of the liberation hero'es history is seem to unknown . So the purpose of this research is to focus the world about to omit such short comings and to show these heroes with the availability of sources. Observing, interviews, newspapers, books are used to conduct this research and analyzed the basis of approach of history*

**KEYWORDS:** *Local rulers, Palayakarar, Kalayar kovil temple, Battle of Kalayar kovil*

#### ABSTRACT

*Students have different types of stressors, and these stressors lead to anxiety and poor performance in the scholastic skills. A number of remedial measures are adopted by students in order to reduce these stressors and anxiety. This study aims to determine the relationship between academic stress, anxiety and academic performance along with remedial measures adopted.*

**Material and Methods:** *an exploratory descriptive design was adopted to collect data from 592 nursing students by using total enumerative sampling technique. Academic Stress Inventory, Beck Anxiety Inventory, records analysis for academic performance and open ended questionnaire on remedial measures adopted were the tools used.*

**Results:** *Findings show that mean score of anxiety (19.09) among M.Sc. Nursing is higher than other classes and academic stress (117.9) score of M.Sc. Nursing 2<sup>nd</sup> year is significantly higher than other classes. 't' value=-2.70 and p-value is 0.01 which shows significant difference*

*between year of study and academic stress. Remedial measures adopted by the students includes 467 (78.88%) listen music, 236 (39.86%) chatting on mobile, 334 (56.41%) Watching TV, 394 (66.95%) talk to their parents/friends to reduce academic stress and anxiety. Among these 284 (48.01%) were satisfied, 157 (26.5%) moderately satisfied, 87 (14.7%) highly satisfied and 7 (1.2%) not satisfied with the remedial measures to reduce their academic stress and anxiety. There was a moderate positive correlation between academic stress and anxiety and low negative co relation between academic performance and anxiety which is evident by r value (.45),(-.02). This study concluded that since students had moderate academic stress and mild anxiety an effective interventions need to be instituted to deal with it.*

**KEYWORDS:** *Academic stress, Anxiety, Academic performance, Remedial measures.*

## Review Process

Each research paper/article submitted to the journal is subject to the following reviewing process:

1. Each research paper/article will be initially evaluated by the editor to check the quality of the research article for the journal. The editor may make use of iThenticate/Viper software to examine the originality of research articles received.
2. The articles passed through screening at this level will be forwarded to two referees for blind peer review.
3. At this stage, two referees will carefully review the research article, each of whom will make a recommendation to publish the article in its present form/modify/reject.
4. The review process may take one/two months.
5. In case of acceptance of the article, journal reserves the right of making amendments in the final draft of the research paper to suit the journal's standard and requirement.
