An International Multidisciplinary Research Journal

ISSN (online) : 2249 –7137

Editor-in-Chief : Dr. B.S. Rai

Impact Factor : SJIF 2017 = 6.049

Frequency : Monthly

Country : India

Language : English

Start Year : 2011

Indexed/ Abstracted : Ulrich's Periodicals Directory, ProQuest, U.S.A.  
EBSCO Discovery, Summon(ProQuest),  
Google Scholar, CNKI Scholar, ISRA-JIF, GIF, IJIF

E-mail id: [academicia@saarj.com](mailto:academicia@saarj.com)

### **VISION**

The vision of the journals is to provide an academic platform to scholars all over the world to publish their novel, original, empirical and high quality research work. It propose to encourage research relating to latest trends and practices in international business, finance, banking, service marketing, human resource management, corporate governance, social responsibility and emerging paradigms in allied areas of management including social sciences , education and information & technology. It intends to reach the researcher's with plethora of knowledge to generate a pool of research content and propose problem solving models to address the current and emerging issues at the national and international level. Further, it aims to share and disseminate the empirical research findings with academia, industry, policy makers, and consultants with an approach to incorporate the research recommendations for the benefit of one and all.

### ABSTRACT

*Sudha Murthy an efficient writer, a philanthropist, a technocrat with her original style and skillful mind has conquered many literary acquisitions. She is a successful modern writer whose works have been translated into many Indian languages. She is a recipient of many awards and the most notable them are the Padma Shri Award and the R. K. Narayan's Award, for her contribution to Literature. This article focuses on the marital disharmony of Mridula and Sanjay and the estrangement of trust in their relationship. The protagonist Mridula wanted to lead a financially secure and solemn life. Her husband had manipulated her completely due to her ignorance and folly, his family members ransacked him. Money had procured his soul. Wealth accumulated him and lead to his decay. The couple was attached to each other as long as their income was equitable to their daily needs. Their relationship fissured immediately after they began to earn in millions. If one compared Sanjay's initial appearance in the novel, with his pretense after success, one finds a striking difference between the two. Success and money had corrupted his entire life. The trust which she had on her husband gets paralyzed and deceived by him. Heartless judiciousness, manipulation over money destroys a marital relationship and the house built of cards collapses. The novel ended with hallucination in which she felt the hand of Sanjay balancing her swing. Sudha Murthy mends a framework of the typical middleclass average characters, which has a realistic individual thinking pattern.*

**KEYWORDS:** *Wealth, Marital, Philanthropist Folly, Trust, Judiousness, Manipulation, Relationship, House.*

**ABSTRACT**

*The article analyzes the characteristics, indicators and factors of the demographic situation in Uzbekistan, the impact of demographic processes on the definition of the current state and perspective directions of the country's socio-economic development have been analyzed. The formation of bringing in an economy with the raw orientation of export, a priority of all-union interests in the activity of the central ministries and departments in a question of development of an economic complex of the republic have had an adverse effect on a condition of the social sphere. For example, because of reforms in the agrarian sector and transfer of agricultural enterprises from state farms and collective farms on more effective forms of managing the process of release of excess labor became more active. Thus, to Uzbekistan, as well as all countries enduring a transitional stage of development practically all standard composite structures of unemployment were characteristic: frictional, structural and cyclic.*

### **ABSTRACT**

*Training has increased its importance in today's environment where jobs are getting more complex and are undergoing constantly change. A training is not complete until the results are evaluated i.e. the organizations need to understand the usefulness against the investment of time and resources. The paper focuses on various models of evaluation available through the literature and tries to understand the challenges faced while using the widely used Kirkpatrick model.*

### **ABSTRACT**

*Peking cabbage is widespread in the countries of South-East Asia. For Uzbekistan, it is a little-known culture. In connection with this, the variety testing of 8 hybrids and 2 varieties of this foreign selection culture was carried out. By results of researches it was revealed that hybrid Seo Jin  $F_1$  and Monoko  $F_1$  are the most productive and early ripening. The difference in the yield of these two hybrids with other tested varieties and hybrids in most years of study was quite reliable and exceeded the NDS. However, the seeming on the initial scale of large additional costs when using the identified high-yielding hybrids are more than pay off due to a high surplus yield. The highest yield was generated by hybrids Seo Jin  $F_1$ , Monoko  $F_1$  and Jang Won  $F_1$ , which formed the largest heads. By weight and number of heads, the commodity and non-commodity yields and the average weight of the head were determined. Field experiments were laid on the experimental and investigational base of the research institute of plant growing located in the Qibray district of the Tashkent region.*

## *Review Process*

Each research paper/article submitted to the journal is subject to the following reviewing process:

1. Each research paper/article will be initially evaluated by the editor to check the quality of the research article for the journal. The editor may make use of iThenticate/Viper software to examine the originality of research articles received.
2. The articles passed through screening at this level will be forwarded to two referees for blind peer review.
3. At this stage, two referees will carefully review the research article, each of whom will make a recommendation to publish the article in its present form/modify/reject.
4. The review process may take one/two months.
5. In case of acceptance of the article, journal reserves the right of making amendments in the final draft of the research paper to suit the journal's standard and requirement.
