Public Administration Department,
Panjab University,
Chandigarh, India.

ABSTRACT

Human Resource has never been as meaningful as it is today. Human resources are the wealth of an organization. The success of any organization irrefutably depends largely upon the efficient and co-ordinate working of human resources. Therefore, every company wants to attract, retain and motivate brains to meet its objectives. One of the tools for retaining and motivating quality workforce is Compensation Management (CM). It is one of the central pillars of Human Resources Management which helps in attracting and motivating the employees and improving organizational effectiveness as well. This is one critical aspect to the success of the organization. The rationale of this study was to examine the extent to which the employees working in different classes in United India Insurance Company are satisfied with the compensation package that company has provided for them. In the present paper sample of 102 Class I, Class II and Class III employees working in different offices of United India Insurance Company on the basis of convenience sampling technique were taken to draw the responses and elicit the results. Pearson’s coefficient of correlation has been conducted to indicate relationship between the variable Class and the responses of the employees. Based on the findings, it is recommended that for any public service organization such as the United India Insurance Company to improve the performance of employees, they should offer fair compensation package that will be specifically designed to link it with performance.

KEYWORDS: Human Resource, Compensation Management, Motivating and Attracting Employees, Organizational Performance, Public Sector Insurance Companies.

CONSOLIDATION IN BANKING AND FINANCIAL SECTOR IN INDIA

Dr. Abha Bansal*

*Associate Professor,
SA Jain (PG)College,
Ambala, India.

ABSTRACT

The consolidation of financial institutions is driven by attempts to exploit economies of scale and scope, and technological advances such as the Internet are making it easier to reap such economies. Although the empirical evidence on economies of scale and scope is elusive, it appears that with recent technological improvements, relatively small-scale banks in emerging markets are likely to improve their cost and revenue efficiency by consolidating and achieving a larger size and scope of activities. Most banks in emerging markets are following the universal banking paradigm and are increasing the share of revenues obtained through the sale of securities, mutual funds, and insurance products. The main forces encouraging consolidation in mature market banking systems—namely globalization, advances in information technology, and deregulation—as well as those discouraging it—lack of information and transparency, different regulatory frameworks, ownership structures, and cultures—are also at work in emerging markets. Present Paper is an attempt to study consolidation practices and their effect in India.

KEYWORDS: Consolidation, financial and Banking Sector, Revenue Efficiency.

ABSTRACT

The importance of customer service for capturing business in insurance companies has become a vital point in all stages of marketing of insurance products. Today, the policyholders preferences keep on changing at a rapid pace and their demands are turning insatiable. Perception of the sample i.e. policyholders regarding need, services, transparency and reliability is influenced by the product and valuable services rendered by insurers. The basic objective of this paper is to design the strategic framework for enhancing customer satisfaction for insurance institutions along with some vital independent variables with the help of statistical tool i.e. t-statistics, ANOVA.

KEYWORDS: Reliability, Quality, Risk coverage, t-statistics, ANOVA, Welch and Brown-Forsythe test.

Review Process

Each research paper/article submitted to the journal is subject to the following reviewing process:

1. Each research paper/article will be initially evaluated by the editor to check the quality of the research article for the journal. The editor may make use of iThenticate/Viper software to examine the originality of research articles received.

2. The articles passed through screening at this level will be forwarded to two referees for blind peer review.

3. At this stage, two referees will carefully review the research article, each of whom will make a recommendation to publish the article in its present form/modify/reject.

4. The review process may take one/two months.

5. In case of acceptance of the article, journal reserves the right of making amendments in the final draft of the research paper to suit the journal's standard and requirement.
