A STUDY FOR EQUITY STOCKS OF AUTOMOBILE SECTOR: WITH REFERENCE TO TATA MOTORS, MARUTI SUZUKI, MAHINDRA AND MAHINDRA

Dr. Mahesh Abale*; Prof. Devyani Ingale**

*Sinhgad Institute of Management.

**Sinhgad Institute of Management.

ABSTRACT

India is a developing country. Nowadays many people are interested to invest in financial markets especially on equities to get high returns, and to save tax. Equities are playing a major role in contribution of capital to the business. The field of equity research is very vast and one has to look into various aspects of the functioning of the company to get to any conclusion about the possible performance of the company in the market. The Indian auto industry is one of the largest in the world with an annual production of 21.48 million vehicles in FY 2013-14. The automobile industry accounts for 22 per cent of the country's manufacturing gross domestic product (GDP). This research paper initiated with understanding the mannerisms of the stock market trading followed by the dynamics of the automobile sector. TATA Motors, Maruti Suzuki, Mahindra, and Mahindra, the major players in automobile sector were selected for analysis. TATA Motors, Maruti Suzuki and Mahindra and Mahindra were further studied in detail with respect to their financials and the management's plans regarding the functioning of the company, their expansion plans, and various news about these companies. This research paper analyses financial information for five years of these three automobile industries by considering various ratios. This research paper deals with the fundamental analysis aspect of the equity research. The researchers in this paper have tried to look into the details of the financial statements of the companies, the environment surrounding of the automobile sector.

KEYWORDS: equity stock, financial statements, automobile, returns etc.

SUGGESTIONS

By analyzing the automobile industry with the help of fundamental analysis, it was found that these industries have a lot of potential to grow. Investing in Automobile industry with no doubt is going to be a good and smart option because these industries are booming all over the world.

From the company analysis, Maruti would be a better option for an investor compared to TATA and Mahindra. In view of the slump in the domestic and international market, TATA has

recorded a slowdown in sales and profit level. Its Earnings per share has also declined drastically. The global turmoil in financial markets has affected Maruti also. The company is maintaining a stable position. Its sales have grown over past five years. Maruti has stability in sales level. Its Return on Investment is also high compared to TATA and Mahindra.

TATA Motors, which was trying to consolidate its leadership position in the market, also had to face the impact of declining sales. Dividends and earnings remain low and consistently falling. Maruti Suzuki has given a satisfactory performance. At present, its shares are undervalued giving it a potential for growth.

The analysis gives an optimistic view about the industry and its growth which recommends the investors to keep a good watch on the major players to benefit in terms of returns on their investments.

ECONOMIC EMPOWERMENT OF WOMEN THROUGH SELF-HELP GROUPS

Dr. Mohinder Singh*

*Principal,
Punjabi University College,
Chunni Kalan, Punjab, INDIA.
Former Professor,
Kurukshetra University,
Kurukshetra, Haryana, INDIA.

ABSTRACT

According to the 2011 Census, there are 586.46 million women in India. It is an accepted fact that women play an important role in the socio-economic transformation of the country. The rural women whom we often call 'farm women' constitute almost 50 per cent of farm work force and play a significant role in the agriculture and allied activities as paid labourers, cultivators and managers. The female work participation rate which was 22.3 per cent in 1991 rose to 25.6 per cent in 2001 and 25.5 per cent in 2011.

KEYWORDS: *socio-economic, farm women, participation, cultivators*
