ABSTRACT

In today's globalization process, a state of rapprochement between different ideas and cultures around the world has emerged, resulting in the displacement of some cultures and customs from others, leading to the emergence of a single culture and ritual for humanity. The diversity in the culture of the world's population is disappearing and a single mass culture is emerging. This will negatively affect the future of countries with national and religious values in the world. In particular, attacks on Islamic culture and its manifestations have a serious impact on the lives and activities of Muslims. Therefore, the issues raised in the work of Nasiruddin Samarkandi "Al-Fiqh an-nofe" play an important role in educating Muslim youth in the spirit of national and religious values, solving social problems in their lives.
