ABSTRACT

The education sector is one of the most innovative industries, which largely determines the creation of an innovative climate and the competitiveness of the economy as a whole. Modern realities of life make traditional methods and technologies of teaching subjects ineffective and uninteresting. Computer science has always been in an advantageous position relative to other subjects, as the use of ICT is an integral part of the subject itself. But how to correctly use this advantage is decided by the teacher himself. In this article highlights of innovative approach to ensuring the continuity of teaching computer science in the system of continuous education of the new Uzbekistan.
