ABSTRACT

The article examines the causes and factors of the emergence of contradictions, the wide spread of contradictions in society, contradiction-conflict-collision, views on the main and minor conflicts. Moreover, if there are no conflicts in the family, at work or in the state, it means that this is where the growth and development of a peaceful life stops. Therefore, it is necessary to study these contradictions and try to eliminate them when they occur, and to try not to have a negative impact on the development of our lives.
