\*\*2nd year student of the Faculty of Industrial Pharmacy,  
Tashkent Pharmaceutical Institute,  
UZBEKISTAN

### ABSTRACT

*The article presents a review of the literature on the metabolism of the amino acid homocysteine, the emergence of risks for the development of a number of diseases due to excessive accumulation of homocysteine in the human body, and possible ways of correcting hyperhomocysteinemia.*

**KEYWORDS:** *Homocysteine, Homocysteine Metabolism, Hyperhomocysteinemia, Hemocoagulation, DNA Dimethylization, Oxidative Stress, Vitamins Of Group B.*
