ABSTRACT

The educational process today is unimaginable without modern technology and IT devices. Modern technologies, including computers, video projectors and other devices, help the teacher to organize the communication process effectively. During the lesson, students will have a better understanding of the topic of the lesson and the object of study will help to form an idea of the process or event, as well as improve the quality of the lesson.

KEYWORDS: *Computer, Projector, Laboratory Equipment, Information And Technical Means (Devices), Visual Aids, Symbols, Textbooks, Manuals, Radio.*
