CIVIL-LEGAL REGULATION OF EDUCATIONAL SERVICES

Djumagul Anvarovna Dadaboeva*

*PhD on Legal Sciences (Candidate of Legal Sciences),
 Head of the Personnel Department, Fergana State University,
 UZBEKISTAN

ABSTRACT

The article examines the views of a number of scientists who have conducted research in the development of the sphere of educational services. Including, this article examines the civil law regulation of educational services. The purpose of a typical educational service is also, of course, to ensure that the learner has knowledge and skills. However, the current legislation does not specify these requirements and conditions in the legal regulation of educational services. The role of the educational service in raising the level of knowledge of the population, increasing literacy of people in various fields of education and knowledge is invaluable. In addition, the education service plays a special role in the training of qualified personnel. Liberal changes in the education system in recent years, the expansion of the participation of private educational institutions in preschool education, school education, secondary specialized and higher education are associated with radical reforms in the educational service. Based on this requirement, laws are adopted that regulate relations in the field of education. In particular, on September 23, 2020, the Law of the Republic of Uzbekistan "On Education" was adopted, the purpose of which is to regulate relations in the field of education.

KEYWORDS: *Education, Education Efficiency, Innovation, Educational Services, Educational Level Of The Population, Civil Society, Educational Institutions.*
