### ABSTRACT

*Gender equality theory, idea, and politics can be seen as part of a long-running historical battle for equality and democracy, but with a particular focus on equality and democracy between women and men, and genders in general. The term "democracy" is frequently used in the context of equal political representation, despite the fact that it is commonly understood in many communities and historical eras to refer solely to adult men. Men and women each are equal and play a paramount position in the introduction and development in their households in a specific and the society in trendy. Indeed, the warfare for equality has been one of the essential concerns of the ladies's motion everywhere in the international level. The difference in sex and bodily form denotes no distinction in popularity. Woman is the complement of guy, and there is no inferior complex anymore. In India, since lengthy lower back, ladies had been considered as an oppressed section of the society and that they were ignored for hundreds of years. Gender inequality in India is a vital truth.*
