ABSTRACT

The COVID-19 pandemic has created the largest disruption of education systems in human history, affecting nearly 1.6 billion learners in more than 200 countries. Human Civilization has come a long way in terms of education. Starting from the 'Pathshala'-'Gurukul' system to modern-day Keywords, we made some massive strides. But, with arrival of Novel Corona Virus (COVID-19), an autopsy has happened to this millennium-old education system. This has pointed us to realize that, when we needed to shift the education paradigm from traditional chalk-talk method to online LMS-Blended learning technique all of a sudden within weeks, we are actually not ready. From premier institutions to the school/ colleges/ universities in rural area, everyone has struggled to some extent and huge amount of ground level remedial work need to be done to overcome the hurdles. Institutions need to be armed with proper infrastructure, teachers need to be trained, contents need to be developed, collaborations need to be built and the list goes on. In this paper we have discussed the challenges faced by the higher education learners and institutes in India. This paper aims to analyze the Impact of COVID-19 on Indian Education System, focusing on education during online teaching and assessment of students getting online classes in this pandemic from settings at home.

KEYWORDS: LMS, Online Teaching.
