ABSTRACT

The title of the article is the usage of online mode of working in post and after COVID 19. The article used the survey technique to collect primary data. The correlative test has conducted to know the charges accrued. The Covid-19 pandemic has changed how we gatherings quickly. Up close and personal happenings were at that point average for some undertakings, and video meetings have considered being support measures for individuals who can't live due to momentous conditions. In the current Covid-19 reality, Video Conferencing has grown quickly as one of the critical business contraptions for an ideal corporate congruity. Numerous organizations improve the readiness of instructors and understudies to give a one-stop-shop. Warbler, for instance, a cooperation arrangement situated in Singapore at first created by Byte Dance as an instrument for inner development, has offered boundless video conferencing for instructors and understudies, programmed interpretation capacities, constant venture co-altering, and savvy schedule planning, among different highlights. Songbird has extended its worldwide worker foundation and designing capacities to guarantee solid availability, to accomplish this rapidly and in a period of emergency.
