SINGLE-ROOTED PARONYMS IN UZBEK

V. Nafasova*

* PhD, Senior Lecturer of the Department,
Uzbek linguistics of QarSU,
UZBEKISTAN

ABSTRACT

Not all constructive affixes are involved in the paronyms of the Uzbek language. Affixes that form a particular group have the status of paronymic pairing. Because paronyms are formed from the relationship of two lexical units, they contain affixes that are close in pronunciation, partially similar, and phonologically common.

KEYWORDS: *Paronymics, Word Formation System, Multi-Root Paronyms, Single-Root Paronyms, Affixes.*
