ABSTRACT

The article examines the unemployment rate and the needs of people for housing, leading to external migration. The purpose of the study is to study the unemployment rate in the regions of Uzbekistan and its impact on migration. In conclusion, it should be noted that in regions with a high level of industrial production, a high share of small business and private entrepreneurship, labor migration will be positive and can serve as an important factor in preventing external labor migration.

KEYWORDS: *Migration, Unemployment, Economically active population, Labor migrants, Uzbekistan, Fergana region.*
