ABSTRACT

*The scientific article contains theoretical and practical views on the issue of ensuring the ideological and ideological security of the Uzbek people in the transition from national revival to the national upsurge. Concepts are given a philosophical definition and their current development trends are shown. The ideas of ancient philosophers on a systematic understanding of the issue of interest helped to create a unique philosophical paradigm about the "Benefit" of the philosophers of the XVIII century. For example, the French philosopher Paul Henri Golbach, in his book *On the System of Nature or the Laws of the Material and Spiritual Worlds*, said: "Interest is the idea of one's own happiness according to one's character and ideas; are things that one of us thinks are necessary for our happiness."*

KEYWORDS: *Security, Moral security, National ideological and security, Public interest, State interest.*
