### ABSTRACT

*Teenagers of school age spend a lot of time in school, and therefore, the clothes worn to school are the most popular and diverse. Based on the analysis and generalization of a priori information and consumer situations, a block diagram of the main functions of modern teenage uniforms is developed. It is established that teenage uniforms are a complex multifunctional object and the development of a wardrobe of uniforms should be approached from a position that primarily provides comfortable conditions for the student in various situations of consumption.*

**KEYWORDS:** *Teen Clothes, The Time Budget Of The Student, The Functions Of The Uniform*
