ABSTRACT

The article examines the foreign experience of models of cooperation. The analysis of cooperative models from European countries, the Netherlands, France and Romania, as well as the United States. Developed cooperative models have been development in Uzbekistan. In the context of global changes in the economy effective organize of various forms of cooperation in agriculture is an important issue. At the moment, experience of cooperative action is deserves careful study and practical use in all respects, because cooperation is an international phenomenon of human activity. The practical significance of studying cooperative activity is that it is an international point of view to enable better implementation of mutually beneficial cooperation.
