ABSTRACT

*This article provides information on the stages of the ontogenetic period of the medicinal plant *Scutellaria comosa* Juz. In the course of laboratory observations, the features of the latent period of the plant were studied. Such features include the formation or loss of individual organs, the growth of the branch, the nature of branching, the degree of development of the surface mass, the number of vegetative and generative branches, the proportions between the height and diameter of the plant.*

KEYWORDS: *Ontogeny, Vegetation, Latent, Virginy, Juvenile, Generative, Subsenile, Ecological, Coenotic, Ontogenetic.*
