ABSTRACT

This article analyzes the essence of the concept of marginal spirituality, which negatively affects the national and spiritual development of society, and also describes its problems and solutions. In this sense, marginal spirituality is analyzed as a social phenomenon, which is a state of spiritual depravity, immorality, degradation, deviations in social relations that go beyond the spiritual life of a person. The main solution to this problem is to educate young people in a healthy spirit, which in turn contributes to the formation of a morally mature person, an ideal person, a harmoniously developed generation, to maintain the purity of the nation. A number of suggestions were made to accomplish this task.
