ABSTRACT

Bakhshi sings about the world of art and poetry, the historical events, the heroic victories of the heroes, the events of the war, the suffering of the people, the general didactic, philosophical world of artistic imagination. This ancient bakhshi was a traditional example of bakhshi inherited from his father Korkit. At the same time, our people have been interested in the history of the origins and development of the baxshi word instrument and the art of baxshi. In the social life of the Turkic peoples, the bakhshis formed the spiritual genius of the people, the formation of public opinion, and led to the national unification of the people, the awakening of a sense of national consciousness, the spiritual awakening. One of the distinguishing features of the Bakhshis' creativity is their talent, natural innate eloquence, and a certain degree of poetic skill, which contributed to the formation and enrichment of folklore. representative of the people, as a mountain of soldiers. The poet lives with the pain of the people. He conveys the cries and wishes of the people to the khan. The khan sitting in the palace is far from the living conditions of the people, he does not know much about their living conditions.
