### ABSTRACT

*If we look at the centuries-old history of the Uzbek people, we can see in our daily lives that this nation has left a great and invaluable legacy for present and future generations in all areas of science, literature and art, architecture and handicrafts. In particular, the art of painting is a flower and a unique kind of heritage left to us by our ancestors. The current changes in the educational process and the work being done to reform the content of education and bring it into line with international educational standards are aimed at radically improving the quality of education in higher education. That is, the use of new information and computer technologies in the educational process requires the formation of creative abilities of students studying in our schools and the development of their creative thinking.*

**KEYWORDS:** *Science, Literature And Art, Architecture, Painting, Secrets Of The Profession, New Form, Information And Computer Technology, Art History, Fine Arts, Architecture, Design, Design, Biology ,Chemistry, Physics, Astronomy, Mathematics, Computer Science, Information And Communication Technologies, Coreldraw And Autocad, Geometric Constructions, Girix, Graphic Applications.*
