### ABSTRACT

*The advantages of adopting modern information technology in secondary and higher education classes are discussed in this article. This has increased the deep interest of pupils and students in the virtual world and digital tools and increased their interest in various programs and electronic applications in learning their mother tongue. It is important to provide all educational institutions with high-speed Internet access. Improved wireless connectivity (Wi-Fi) allows a large number of computer devices, storage devices (e.g. eCloud) to be connected.*

**KEYWORDS:** *Continuing Education Information Technology, Computer, Lessons.*
