ABSTRACT

The article examines the system of formation of investment activity in the country and the factors that reflect investment activity. The impact of investment activity factors in the formation of investment potential of the regions was assessed. The systemic development processes between the system of formation of the target development hierarchy of increasing investment activity and the strategy of its implementation are studied. The country has developed scientific proposals and practical recommendations to improve the integration of the specifics of the investment process and the conditions and factors of its development.
