ABSTRACT

The article examines the role of innovation in employment in the economy, the processes associated with the intensive dissemination and introduction of innovative technologies in production processes. At the current stage of socio-economic development, the role of transformation processes in the field of employment has been assessed. The objective system of development of innovations in employment in the economy and their impact on the formation of employment are described. Scientific proposals and practical recommendations for improving the employment system by increasing the role of innovation in the economy have been formed.
