### ABSTRACT

*The purpose of the study is to reveal the features of the formation of a new social and informational space of our time and the work of consciousness under the influence of information and communication technologies. The author tried to present the work of thinking in the context of the virtualization of modern society. The scientific novelty lies in the interdisciplinary consideration of the issue of virtualization of thinking with the involvement of the works of modern philosophers, sociologists, psychologists.*

**KEYWORDS:** *Virtual Reality, Consciousness, Cyberspace, Information And Communication Technologies, Internet, Virtualization*
