ABSTRACT

This article discusses the need, importance and stages of implementing a smart farm in our country. This article gives information about government support to smart farms (meat and dairy processing farms, livestock processing businesses). In this case, it is recommended to determine the value of financial incentives for entities involved in the system of financial support of the livestock sector. In addition, modern technologies that can be used in the "Smart Farm" and organizational and economic stages of the organization of a Smart Farm are analyzed in the paper.

KEYWORDS: *Livestock, Smart Farm, Digital Technologies, Internet, Modern Technologies.*
