ABSTRACT

Pedagogical design-the use of knowledge (principles) about effective educational work (teaching and learning) in the process of design, development, evaluation and use of educational materials. The preparation of such lessons requires even more careful preparation than in the normal mode. Concepts such as the script of the lesson, directing the lesson - in this case, not just newfangled terms, and an important part of the preparation for the training session. Designing a future multimedia lesson, the teacher must consider the sequence of technological operations, forms and ways of presenting information on the big screen.
