ABSTRACT

Winged words occupy a special place in national and world culture, reflecting the thoughts of great philosophers, scientists, writers and statesmen in a polished form. These are phrases that clearly and figuratively convey deep thoughts in a laconic form, briefly outline the meaning of complex situations and characters. The following article gives an idea of the winged phrases that characterize the negative traits that are observed in male and female relationships. Their meaning is widely covered through semas, where the meaning of the words is clearly described.

KEYWORDS: Winged Word, Phrase, Figurative, Meaningful, Laconic, Sema, Negative, Feature, Meaning.
