### ABSTRACT

*The essence and structure of pedagogical activity, as well as the effectiveness associated with them, is one of the most pressing issues of pedagogical science and practice. Typically, the scientific analysis of these important events is replaced by general discussions about pedagogical art. This article discusses the skills and activities of professional teachers in modern education, as well as the role of higher education in the training of qualified personnel. The reasons for many unsuccessful attempts to improve pedagogical systems and changing its elements are related to a local approach, not a systemic one. The society that forms the social order builds an appropriate education system as the most general pedagogical system. The reasons for many unsuccessful attempts to improve pedagogical systems and changing its elements are related to a local approach, not a systemic one. The society that forms the social order builds an appropriate education system as the most general pedagogical system.*

**KEYWORDS:** *Skills, Modern Education, Professional, Staff, Educator*
