### ABSTRACT

*A number of projects and decrees are currently being developed to digitize and secure the state tax system. There are given main information about tax risks analysis and their role in the economy of country in this article. Definitions of several necessary terms are provided to reinforce knowledge of tax risks and perform clear analysis practices. This is a dangerous situation, which can lead to non-payment and (or) incomplete payment of taxes and fees to the budget. Analytical data is collected according to the level of tax risk and analyzed by regions, and divided into levels and automatically transmitted to the regional tax authorities. Tax risk analysis helps in identifying tax violations. Such analysis, as well as evaluation of the results, is carried out using the automated software product "Tax Risk Detection, Analysis and Assessment" (Threat Analysis).*

**KEYWORDS:** *Tax System, Tax Risks, Risk Detection, Taxpayers, Potential Tax Risk, Tax Risk Level, Tax Risk Analysis.*
