ABSTRACT

Ideology of Secularism was framed by India's freedom fighters and legislators based on the location, structure and types of India's culture and religion for protect multi –people interests. Basically, India is a country where diversified people are living with diversified interest and happiness .The government and its policy should be guardian of all religion without creating stumbling blocks to interest and welfare any religion habits, customs and convention .Because, once this formula was broken by an any anti-social elements or wrong government policy it would be highly and deadly dangerous to secularism and India's integrity. To avoid these kinds of forth coming dangerous of anti-secularism activities from the any community and political parties, the government needs to adhere strictly a common wheel polices and approaches irrespective of the caste, class and religion .The vision of India's ancestor on secularism is to make a pivotal parts of India's government that should be looked frequently by the ruler and administrator to ensure the integrity of India and protect secular identity of various people. This type of oversee attitudes of ruler and administrator makes people to feel that they are part and parcel of multi religious country of India without socio ,economic and political draw backs . In India there are lot of anti –secularism and minority violence are increasing from the government side instead of arising from the people side .In old days policies were legislated for integrate people interest for maintain ideology of secularism. The present government is treating and enacting policy against the secularism and minority communities on account of minority people could not do any think against majority community. Therefore this study has been focusing on importance of secularism for the integration of India's in future as well as at present and suggests to accommodate minorities' interests and stop killing them in India.

KEYWORDS: *Anti-Secularism Policy, Anti-Minority Attacks, Human Rights Violations And Breaking The Islamic Community Relations.*

INTRODUCTION

The core principle of the secularism in India is to accommodate the multicultural, ritual, interest, caste and religion along with elaborated policy for enable all people to grow on equilibrium platform irrespective of socio, economic and political differences and status. There are happening so many atrocities and gruesome events in India against secularism ideology with aim to split multicultural integrity .In which the innocent and minority people have been suffering much more as unanswerably by anti-people attacks of the government and polices since 2014 to 2015.This is very ruthless activities of ruling government over the minority development and life in India. In ancient days politics were run by the ruler toward defeat the enemy and exploit other country resources ,this barbarian ruling culture was vanished and changed after people and world community woke up to know their rights for get freedom and run independent life in the civil society of the world .

People awareness let to disappear the inter country war and exploitations of other country resources. Now India's ruling party and upper community people forcing entire multicultural people to go to above said ancient social status by iron control , armed attacks and political pressure over the minority to keep salve to dominant community and submissive to their arrogant political activities. In fact ,the minority People were cheated by the political party bearers and leaders to attain the political power by the duplicate political manifesto .Due to this ruling party pressures and atrocity minority people liked an alternative ruling party in India but they don't know that elected alternative party known as upper caste people will enslave them under the majority community to their political ambitions or crush down them to follow upper people food habits by beating ,killing and humiliating .

These inhuman activities and polices have been practiced by the ruling government along with inclination to enslave minorities like ancient civil setup for keep them at upper caste control and arms .Since beginning of the new government to rule over the India from 2014-2015 ,its ant-secularism and anti-minority policy have been affecting the minority people from basic life to politics .The policy of today government absolutely seeming to be inciting communal violence through the their caste party bearers .Their attitudes are focused at preventing the life growth of minority people ,motivating inter community caste feelings and fights in each villages of India. All these ruthless politics and policy of the majority community have been destroying the minority life that they got after 69 years through the hard labors from the slavery setup society of India's .All this causes made them to understand so much about the ruling government activities of community breaking, disturbing people peace and escalating communal violence as minority people could not develop and progress.

The gruesome policies and caste based activities of the majority over the minority are being as a serious threat and panic to be daily life of minority people in India as well as India development .the majority community activities have been resulting at serious destruction way minority people like rapping girls ,making nude minority girls ,giving corporal punishment unless they obey to their local politics ,chopping minority people regarding to lower people love over upper people to show their mighty and showing of bravery affecting attitudes over on the minority

community in nuke and corner of the India's villages .For all these their frivolous and fearless activities have been tolerated by the minority community and Islamic people since they are as powerless ,propriety less and socially feeble community .

Still from the central to state the minority people have been attacked by the ruling party on account of caste and food habits differences .No political leader from the central and state have never raised their voice to protect them in India .Because, all major political party leaders of India's are belongs to upper caste people who have no sympathy or courtesy on this issues. Majority people like to rule the minority people through their violence. Their political agenda is not to let other for live or use political benefits and economic advantages than keeping slave other caste people and preaching their caste principles to rest of people in India.

Improper policy impinging on minority community life

Now days India's policies are toward disturb, disintegrate and destroy the minority community people life and development all these policies were disrespected by the like Muslim, Dalit,Sikh, Tribal and fisherman community. Through their arrogant policy they would like to reinstate ancient slavery system omitting all the modernly emerged developments .Except all other community in India the minority people alone have been creeping toward socio-economic and political development after 69 years while rest of community and caste in India have attained socio-economic and political status before 1947.

Indeed ,the inapt policy of the present government shows its intolerance over the minority community developments in terms of social ,economic and political institutions .Generally, the ratio of the minority community people in India constitutes more than 65 percentage unless their cooperation India could not have become as a shining country and protected secularism ideology .So ,the minority people hard work at agriculture land alone have made India as shinning country and kept majority people at sophisticated life since the minority people do not have a respectable social status and money power to rule the people .None of policy of the so many government in India do not keep survive the minority people as happily as stress free .In fact the ruling community have been living at the sweat of the minority hard labor and they tasted their daily enjoyment of socio-economic and political benefits through the minority community traditional bondage works to India's developments .

So, based on this horrible and heart renting minority socio-economic and political position ,the present government needless to do service to them but it may be calm not disturbing ,infuriating ,inciting communal violence and inter caste fight at the India's villages .Because ,the minority people have felt now only that their untouchable fight was over with majority community in India after long decades, reversely to this, the present government perpetuating the same fight has to come to be soil of the India for break the multicultural unity and integrity .Indeed ,past two years the minority people are facing so many consequence of the intercaste, fight ,love issues ,honor killing and power sharing at government places .

All these incident took place duet to present government policy motivation and the higher caste people dominating policy counseling's to India's officers (the times of India 5 Oct, 2015). This kinds of unsecular policy of India's upper community people and government highly attempts to break the secularism and makes the minority to feel as an unattached with secularism ideology. In fact, the government irrational polices has paved way to divide India as two parts in future,

one minority and other majority .This two elements will be fighting as an endless to share social benefits and show their superior power.The secularism would be broken in future .So ,this is a blatant prediction of the present government policy and attitude .All these incidents have been as a continuous phenomenon against minority people since India's independence. So, government controversial anti-minority polices and arrogant activities are needs to be stop by good policy makers based on the view to protect secularism for protect the multicultural identity of India's society.

Partial religious policy affects Islamic people

In the world ,the same community does not have relation with same community because lack of continuity , In India Islamic religion is only one community which is having universal relations in all countries of the world .The reactions of anywhere Islamic attacks will be creating worldwide Islamic conflict with apposite religion and ruler .In this perspective the present government have legislated a new law (prevention of cow eating)in India .It affects largely Islamic livelihood and habits of personal , and individual life style. Some of religious fanatics and ant-minority groups have attacked a Muslim family in Bisad village near Dadri, Uttar Pradesh an account of they had cow meat at their home .Same attack was done on another Muslim family in which family head Akhlaq was killed by the ruling party mob in New Delhi on September 2015 an account of that family have had beef. Succeeding other attacks was orchestrated by the religious fanatic mobs in Anrapradessh ,a boy was brought to the public street by the group of mob and tipped him at drainage channels asking to say (harijairam ,harijairam), its meaning is to convert Muslims to Hindu religion forcibly by the Hindu higher caste people Indeed .All these brutal and anti-minority attacks have been splitting the unity of secularism, psychologically makes people distress ,makes resentments among the minority people toward revolution and shows ruling party majority and mighty.

Attacks on Indian Islamic community affects India –Afghanistan relations

After 1955,India –Afghanistan relations met large gab in terms of socio ,economic and politics due to several reasons of geopolitics ,religious politics ,allied politics and power politics .Since 1947 on wards two partners are being mismatch to the all the aspects of smooth relation for maintain a friendly relations in south Asia .How did come gab ?and how do they feel about India relations over the Islamic community is known very clearly to be all the academicians and rulers ?.In fact, the reason for Pakistan separation ,often terrorismattacks,severalHindu partial and brutal attacks over the Islamic people in India have created Islamic angry and aversion on India .All these notorious activities of the India's political power holder have let to segregate Islamic people themselves from the India's Hindu politics. They perceived that Hindu religion is an incompatible to Islamic and minority community. The sporadic Hindu domination attacks on minority socioeconomic and political platform and Demolition of babri masjid On December 6, 1992 created a strong scornful aversion among the Islamic people over Hindu culture setup. Still the Islamic angry on India's arrogant Hindu political ruler and follower have been continuous process through the terrorism. (The Hindu, 2009). It is true that this kinds of majority attacks over the minority has affected not only Islamic community but also affected all the minority people sentiments and dignity on terms of human rights aspects.

Indeed ,all these bitterness and inconsolable situation of the minority community came to be an end slightly in 2001 through the international community support for establish a friendly

relations with Afghanistan after so many years .Unfortunately Taliban attacks on (WTC)world trade Centre in USA have offered good opportunities to India for project its long fostered relations with Afghanistan through its reconstruction activities in Afghanistan .When two partners relation do not come to be a well-established relations ,the Hindu domination over the Islamic people like attacking ,speaking sarcastically, killing beef eater and prohibition of beef eating habits have created a serious and dreadful Islamic provocation and gap between the two nation .This attitudes of majority Hindu people probably will push two country to go back to old days severe conflict situation(The Hindu,2015).Therefore, it is better to enact a new law to protect minorities in India unless secularism would be meaningless than being as a namesake ideology of India's constitution.

India needs to accommodate minority dignity

Obviously it is not only would be enough incorporation of secularism principle at the preamble of India's constitution and it has to make an effective law for protection and accommodate of minority welfare and social security .Because ,India's constitution makers selected secularism to accommodate and facilitate different religion irrespective of caste ,color ,race and religion bias .Actually the main aim of secularism is to make people share ,participate ,practice and perform their interest in the Indian soil system despite every person attached with some religion and caste .So ,this kinds of India's policy was known widely as just an eyewash ideology .Truly, itsaim is to protect multicultural entity of India ,being as fence to prevent religious ,caste and community oriented conflict and fights in India. In fact ,the Indian government alone says that secularism is for protect inter community people and multicultural people interests in India but the same government and ruler are ruining, provoking ,inciting and instructing to their party cadres to create anti-secularism activities against the minority people in India for the vote bank purpose ,power sustaining purpose and nurture Hinduism ideology .The chief purpose of this contemporary caste oriented violence of the majority people over the minority is to make slave them under the umbrella of Hinduism principles .Therefore ,government or policy makers are obviously needs to focus on this issue to protect the thirsty of secularism and minority life.

India needs to transplantations its anti-social elements

As never before in the Indian history or in the world history the minority people have been killing by the majority people of India for their political power and social status .The majority community defined as power holder ,prosperity holder ,being dominant in each village affairs ,caste differentiations and attacking minority in a sympathy less way for demonstrate their altogether mighty in the Indian social setup toward keep salve others and rule over-all these activities of majority ruler affects India's economic growth ,splits secularism ,disintegrate people fondness and create communal violence .

Thereby, India's appearance in abroad has been humiliated by the international community when India's leaders travel to foreign visits for make an agreement's and MOU in the fields of education ,security ,and economical. Indeed, no foreign policy or domestic policy of an any country would not be effective , it would be collapsed by its unethical appearance in the international scenario and in domestic scenario (The Guardian ,2015) .As reflection of this study , Pakistan launching continuous cross border terrorism and bomb attacks on an important monuments and entity of India's due to majority people wrong role toward ban of beef eating and attacks Muslim people in the different state of India's.

Needs minority support for India's developments

It would not be fruitful unless Indian government seek minority support despite it embraces aboard country economic cooperation .The unhappy conditions of minoritylike ,crying, women's raping ,preventing minority people love by killing ,discriminating Dalit's ,Muslims , tribal and spoiling minority community people life ineducation institutions have been asgreat stumbling blocks to India's foreign policy as well as India's integrations. Because ,minority community in India's Hindu systems have been facing so many torture and inhuman practices by the majority community in terms of socio-economic and political patterns .Thereby ,the minority people are segregated ,isolated and discriminated from the Hindu social setup despite they are found as an archipelago of India's social setup by working restless ,facing endless poverty and suffering from homeless .For the smart development of India's future as well as at present ,the today government have to accommodate the minority in the gamut of socio,-economic and political development as equilibrium as equity.

CONCLUSION

If there is a garbage inside of home it will not be clean, as it a country could not develop or shine internally and externally toward soft development and hard development having huge internal problems. So, since the minority is having continuous relation over all the world, the majority attacks and discrimination over the minority are provoking common people and tarnishing India's image externally. Frequent caste based discrimination and attacks on the minority people in India have made an irreparable stumbling blocks to its country integration, secularism and foreign policy. Among the minority community, the Islamic community in India having relation internationally as flora as fawna ,the ratio of Islamic population in India is in second place next o Indonesia and its neighborly countries like Afghanistan , Pakistan and Bangladesh .It has been main source of India's security and prosperity .Any disturbances and discrimination on Islamic people will hurt the India's relations with Afghanistan ,Pakistan and Bangladesh in terms of security ,economic ,culture and politics . Therefore, India sincerely needs to stop its political oriented communal violence, it hast to punish the anti-social elements of ruling community over the minority attacks, it should not intervene at secular and multicultural affairs of diversity people of India's community. Therefore ,India needs to regulate its arrogant caste splitting politics than showing much more interest toward foster majority community in all the vital fields for rule successively constricting the minority people .Therefore, India needs to enforce a special law for protect minority community from the torture ,attacks ,violence and socio economic discrimination of the majority community in India.
