 UZBEKISTAN

ABSTRACT

The article provides information on the upbringing of children in out-of-school education in Uzbekistan, the importance of five initiatives in child development, the qualities of a child's readiness for public life in a rapidly developing society. It also focuses on the implementation of five initiatives put forward by the President in children's schools "Barkamol Avlod", international assessment programs, as well as an integrated approach to this system.

KEYWORDS: *Generation, Society, Five Initiatives, Life, Education, Circle, Program, Education, Complex, Management, Efficiency.*

INTRODUCTION

Education and its place in the world civilization are essentially determined in the end by a high and always urgent problem. The main goal of any public policy is the intelligence of future generations and spirituality. Rewarding the next generation is spiritually mature, well rounded, intellectuals are a priority in any country. The World Educational Forum (World Educational Forum), "WorldSkills" plays a special role in creating an innovative system based on a comprehensive framework. Currently, the priority of education is characterized by improving life skills, harmony with theory and practice, and self-sufficiency skills in harmony.

When we look at the international experience, the school education of a child is explained by the level of preparation for life and is also important for the active development of public life, and this is one of the urgent tasks facing educational institutions. In the process of education reform,

the complex unit of theory and practice is explained by the interaction of education and other institutions in the formation of the child as a comprehensive mature person.

The system of extracurricular education in Uzbekistan has been one of the most common types of education in recent years. Activities of children's schools "BarkamolAvlod" children's schools consist in the profession, the development of talents and abilities, the implementation of life skills, the meaningful organization of their leisure skills. However, it is necessary to develop research models aimed at providing a comprehensive, bold, developer generation in a global society, activating a harmonious generation and self-development.

Resolution of the President of the Republic of Uzbekistan "On measures to radically improve the effectiveness of extracurricular education in the public education system" 30 September 2019 in PP-4467, Resolution of the President of the Republic of Uzbekistan "On additional measures to further improve the education and upbringing system" 6 November 2020 PP-4884, Decree of the President of the Republic of Uzbekistan "On measures to develop the spheres of education and upbringing, and science in the new period of development of Uzbekistan" 6 November 2020 UP-6801 these are important documents for current education.

Young people who are our future in every way, communicative, wise, intelligent, can find a decent sunny life in life, is one of the most aspiring challenges in our community. Consequently, a number of decisions and arrivals are made to serve as programs in reproducing these functions. The main purpose of the internship is to improve the effectiveness of education, which is a pressing issue that is critical to this modern teacher ability.

In addition to school education in Uzbekistan, extracurricular education is a unique system, which is a large school that develops children's development, efficiency, ability. A number of decisions and decisions of the President of the Republic of Uzbekistan, the number of decisions made in this system will be determined in order to find their children in the world society, as well as our children in the world society. Research in the system serves to improve the efficiency of the industry, improve the development of the industry, improving the quality of scientific and implementation of scientific and implementation of scientific and implementation of quality of scientific and implementation.

In accordance with the decision of the President of the Republic of Uzbekistan "On measures to further improve the effectiveness of the President of the Republic of Uzbekistan" on measures to radically improve the effectiveness of the President of the Republic of Uzbekistan "On measures to improve the effectiveness of the President of the Republic of Uzbekistan" Action Strategy for 2017-2021, President

It is known from history that before the ancient parenting is important to society and takes this problem seriously. It can read a lot of information in ancient works. In particular, Farabi is Fozil's own team for grouping people according to different attributes. No need to pay attention to people, abilities, abilities, psychic talents, not to religious sects or the race of people. The state also needs to be regulated by a local person; That is, he says that he is fair and wise, create laws and create laws and take care of the future, care for concerns of the Republic of Uzbekistan" " Creation of modern methodology, improvement of state requirements and development and implementation of a new generation of educational and methodological

complex, further improvement of the effective organization of the activities of extracurricular educational institutions.

Despite the fact that education about conducting education in the service of Farabi is a close education, it emphasizes that every place and feature is in the development of a person.

Beruni can beautifully make any morally harmonious person of human weakness. Beruni is important for human qualities-if it is purity, and the closest thing to a person says that his nature and spirit. That is why man shows that his nature is to make things pleasant by his pleasure. At the same time, with the inner world, the outer beauty, the harmony of beauty is a way of life. It has been noted that the work of strollers, words, words, hearts, their daily lives, to this, and everything they do in their daily lives, is beautiful.

The possibility of separating religious and spiritual requirements, this possibility gradually becomes characteristic of human behavior. Ibn Sina plays a special role in shaping a person, the people who surround him around a person who is not only to the external environment, and people know the world around them, but also to find the formation of access or evidence in his behavior. Therefore, it does not require children to be careful in raising children, so as not to teach the child bad habits, you need to keep it away from the bad environment.

Scientists of the CIS countries R.Meminsky, S. A. Shakova, E. Mitina, N. V. Chit, L. P. Shopina, E. Bredis, O. Shkapovar, P. V. Gornostaev, V. A. Gorokhov, L. A. Kokhanova, V. K. Tebiev and additional education conducted research on the regular development of the child's creative skills and creative languages. V. N. Tersky, A. S. Makarenko noted that a person should be educated in an integrated system of the system. He says that the role of outstanding educational institutions for the knowledge he gained in school is invaluable and definitely in practice. Therefore, they were eager for young people to study and nurture.

Our children are engaged in independent thinking, modern knowledge, and their profession, has a solid vital position, and rising that of a true patriot nation is important.

The 5 initiatives that were sent to the president were met with great interest by our people and young people. Deep thoughtful goals and objectives are given in the content of each initiative.

The first initiative serves to raise his talents in music, fiction, literature, theater and art, to create the necessary conditions for young people to show the skills of young people, their ability in sports. The third initiative is aimed at organizing the use of computer technologies and the Internet between the population and young people. The fourth initiative, in turn, is aimed at increasing the spirituality of young people and organizing systematic work to promote communication between them. The fifth initiative involves the problems of women's employment.

The Five initiative fulfills the spirit of modernity in the wishful mind of the younger generation to launch them into new areas of creativity. Indeed, the scope of work carried out in our country, the scope of work carried out related to young people, is very wide. This process is based on the designated responsibilities for education managers, staff, and education. Young people are the successors of our future, their attention to them today, attention to the future of our state and the future of our people.

It is this five initiative that requires the integrated functioning of children's schools "BarkamolAvlod" in the system of extracurricular education. The role of children's schools "BarkamolAvlod" is of great importance in the significant free time of the child. It shows that cooperation with such schools, special sports schools, neighborhood and high schools, as well as a number of other institutions. The child will find it worthy to find his place in life to make the theoretical knowledge that the practitioner wants to make it. In a child from young adults, the scan itself provides its own activity in social relations. From childhood, the initial skills and skills of any profession play an important role in the growing master of their profession in the future. Cooperation with production enterprises in the field of children's schools "BarkamolAvlod" will allow the child to develop in a complex society. Cooperation between sports complexes of children's schools and special sports schools " BarkamolAvgans and special sports schools provide the meaning and potential of the learning process.

President of the Republic of Uzbekistan "On measures to improve the effectiveness of extracurricular careers in public education" schools of the scope of the scope of BarkamolAvlod in children's schools "BarkamolAvlod" will again cooperate with your teacher, allowing you to create a free environment in the place where he is familiar to himself.

Children's schools of "BarkamolAvlod" prepare the child not for the exam, but for life. Concept of the President of the Republic of Uzbekistan 29 April 2019 " Concept b by Decree No. PF-5712 notes the main directions of long-term development of the public education system, including:

Achievement of the PISA (The Program for International Student Assessment) of The Republic of Uzbekistan. International Student Assessment Programs International student development programs at the international level is one of the top 30 leading countries;

The objectives of the system of continuing education are put aside in the direction of the quality of the content of the system, as well as training, retraining and advanced training of professional personnel.

The participation of the Republic of Uzbekistan in international programs and studies (PISA, TIMSS, PIRLS, etc.) in the public education system was revealed. "Tasks are registered in international programs and studies.

The child's theoretical knowledge will be transformed into entertainment in non-school educational institutions. It is self-evident that the child is ready for life, and not directly for the exam. Life skills develop and manifest as a person.

Conclusion it can be said that the child's focusing skills are reflected in the practice, acquired and formed in the child's mind on the spot. In addition, at the time of school, the meaning of a child's life is a leading tool in his future marriage and will become an active enterprise for society. The development of the future of the motherland is determined by the abundance of such active people in society.
