ABSTRACT

The pedagogical profession is individual in nature. The role of every educator is to be a master of his or her job, a master who is highly advanced, knowledgeable, or a master of his or her job. His pedagogical skills are reflected in his work. First of all, the educator must be well versed in the laws and mechanisms of the pedagogical process. In this sense, the generalized skills of the teacher, his pedagogical technique are of great importance. Achieving pedagogical skills is accomplished with certain personal qualities of the educator. Pedagogical skills at a high level represent the development of pedagogical activity, mastery of pedagogical techniques, as well as the personality of the teacher, his experience, civic and professional status.

KEYWORDS: *Pedagogical Skills, Technology, Profession, Educator, Personality, Personal Treats, Pedagogical Activity*
