**ABSTRACT**

*This article analyzes and compares the comparative-typological aspects of some zoonyms in stable compounds found in German and Uzbek. . Mythology is based on the animation of the forces of nature, depicting them in the form of emotional images, separate beings (people, animals). They, in turn, assimilate into many languages and form secondary nouns of a specific international character in the composition of phytonyms and zoonyms in those languages.*

**KEYWORDS:** Terminology, Phytonyms, Zoonyms, Mythonyms, Secondary Names, Narrations, Legends, Mythology, Source Of Inspiration, Fantastic Imagery, Plants, Creatures, Associative Thinking, Mythophytonyms, Mythosonyms
