ABSTRACT

This article analyzes the war-themed poems in the poetry of the talented poetess Aydin Hojiyeva. The hopes and aspirations of the society, which has gone through a long period of hardship, and the courage of our compatriots, who have bravely overcome difficulties, are expressed in life and the future. The article approaches the expression of patriotism and freedom in connection with the theme of war in the poet's poems. This period was very important both in terms of ideological and literary development, including the literary and creative activity of prominent representatives of our literature. The lyrical harmony and rhythm of the poem is reminiscent of the sound of tanks; the image of a hero who perished in an unequal battle is perceived in such a sad, mortal, yet, courageous harmony.
