ABSTRACT

In our country, a number of projects are currently underway in the sector of education. The creation of a new interpretation of the Republic of Uzbekistan's law "on education" demonstrates that great attention is devoted to work in this field. The employment of pedagogical tools in the process of teaching Chemistry subjects improves teaching effectiveness. This essay will address the use of pedagogical tools in the process of teaching chemical sciences.

KEYWORDS: *Chemical Sciences, Process, Pedagogical Technology, Experiment, Application, Chemistry, Organic, Effective Methods.*
