ABSTRACT

In this article, the analytical operations of thinking operations theoretically illuminated and grounded. The basis for the conclusion is the initial judgments from which a new judgment is derived. This new judgment, obtained by logical means from buildings, is called a conclusion. Mental operations with visual-active and visual-figurative thinking are carried out with information that gives us emotional cognition in the form of direct perception of specific objects and their images-suggestions.

KEYWORDS: *Synthesis, Comparison, Object, Abstraction, Visual-Effective, Ontogeny, Discursive, Holistic, Contemplative, Contemplative Operations, Integration.*
