ABSTRACT

The article discusses the impact of modern electronic media on the culture of the individual. The negative impact of the global system on national traditions and values is considered. This charter is a clear indication that information and communication technologies are an important factor in the development of the world community in the new century. This is when tensions arise in relationships, which often turn into an electronic culture struggle. Ensuring e-culture in open information systems is an urgent need of today.

KEYWORDS: *Morality, Informatization, The Virtual World, The Exchange And Reception Of Information, The Level Of Public Awareness, The Number Of Users, The Negative Situation, The Spiritual Upbringing Of Young People, Ideological Immunity, National Interest.*
