ABSTRACT

The article discusses the main feature and importance of technologies and mobile devices in teaching as well as learning foreign languages. Cooperative learning within IT technologies is a strategy that maximizes student engagement, reduces class tensions, and promotes student learning. Typically, students work in groups and plan to use cooperative learning frequently in classes, consider arranging your classroom to facilitate in learning foreign languages. It should be mentioned that in our new developing country, the benefits of IT learning are obvious. That is why IT teachers along with teachers of English are creating different softwares and strategies. The use of Internet resources in teaching foreign languages undoubtedly carries a huge pedagogical potential, being one of the means that turns teaching a foreign language into a living creative process. Of course, one should not forget that teachers teach, not computers. A computer is just a complex machine in the service of man, and it will never replace a teacher.
