ABSTRACT

The article presents transport activities and objects of its infrastructure subject to classification for various reasons, also by subjects of use. In this regard, the role of road transport in the prospective transport balance of the country should be clarified and a corresponding adjustment of the state transport policy should be carried out. The designers assure that it will take no more than two lanes on the road. The ground clearance of the bus is more than two meters.

KEYWORDS: *Transport Infrastructure, Car, Elevated Bus, Clearance Of The Bus.*
