ABSTRACT

Communicativeness in the learning process is also required to focus on the ability of the student to communicate effectively in the learning process, to easily master the skills of using and using electronic resource products. In other words, as a result of the student's ability to use the electronic learning process in the classroom, in the classroom and in extracurricular activities, the competence to acquire communicative skills also develops. As mentioned above, in addition to extracurricular activities, there will be an improvement in the effective organization of club activities. The use of e-learning resources in biology clubs allows students to learn science more thoroughly.

KEYWORDS: *Natural Sciences, Natural Science Effectiveness, E-Learning Resources, Open Educational Portals, Students, Education System, Biology Lessons, Educational Technologies, Teaching Methods, Modern Teaching Aids, Continuous Learning Stages.*
