ABSTRACT

This article is devoted to the analysis of the grammatical category of movement style. The article describes the historical aspects of this part of grammar, the results of current scientific research. The views of such thinkers as AlisherNavoi and Mahmud Kashgari are analyzed. It is appropriate to cite the following reasons for the recognition of the noun style: first, the name corresponds exactly to the national nature of this grammatical category in the verb; it also avoids the confusion associated with naming a single event under different names. On the one hand, language is a means of materializing the product of thought for man, and on the other hand, it becomes a material basis, an opportunity for speech, a means of extracting the product of thought.
