ABSTRACT

This article analyzes the monograph "The life and work of Alisher Navai" by the scientist Olim Sharafiddinov, written under the pseudonym Ain, and comments on the research's work in the field of "Navai" research. They say that valuable information about the life and work of Alisher Navoi was passed on to us by Navoi's contemporaries and included in all historical works of the 15th-16th centuries. The comments of the scientist Sharafiddinov were acceptable to the leaders of the system and the leaders of that heavy ideology. Most readers who read Navoi's poems, in particular "Farhad and Shirin", ignore the old images.
