ABSTRACT

The article analyzes the data obtained as a result of the study of the agro-tourism potential of Parkent district, identifies the tourist potential of the district, opens opportunities, identifies tourist facilities. The fact that its territory is surrounded by mountains gives a unique charm to its nature, and as you cross the boundaries of the district, its diversity becomes apparent. The region's natural water sources include dozens of streams and more than 500 springs. The water sources of the left tributaries of the Chirchik River are Parkentsoy, Boshqizilsay and Aksakotasay Parkent.
