ABSTRACT

This article analyzes the subject, content and essence of the science of professional psychology. Psychology is the scientific study of mind and behavior. Psychology includes the study of conscious and unconscious phenomena, including feelings and thoughts. It is an academic discipline of immense scope, crossing the boundaries between the natural and social sciences. Psychologists seek an understanding of the emergent properties of brains, linking the discipline to neuroscience.

KEYWORDS: *Content, Professional Psychology, Behavior, Conscious, Phenomena, Academic Discipline, Occupation, Retirement.*
