ABSTRACT

The article discusses some international experience in creating educational dictionaries, which contains the composition, main content and form of the dictionary, which should be taken into account when compiling it. The advantages of grammatical dictionaries in electronic form are revealed. Linguistic research has raised the issue of creating dictionary types by scanning large volumes of dictionaries to save time when working in a particular field, and classifying dictionaries from the point of view of the grammatical system within language levels to avoid wasting time.

KEYWORDS: *Dictionary, Mathematical Dictionaries, Electronic Dictionaries, Corpus, National Language, Corpus Creation, The Role Of Mathematical Dictionaries In The National Corpus, Foreign Experience, Linguistic Dictionaries*
