ABSTRACT

This paper attempted an exposition on the importance of international relations in sustaining international trade, while preserving the environment because these activities affects the environment negatively. Objectives of the study includes identifying effects of insecurity on sustainable international relations. Highlight relationship between international trade and environment and identify the benefits of sustainability. To this effect, exploratory research design method was adopted while Synthesis of previous studies was explored. The study was able to achieve its objective. Therefore, the study recommended that government and conscious citizens should take immediate steps to extend international relation around the universe, Nigeria, should maintain good relation with foreign countries. and, at the same time the government ought to make massive awareness throughout the country with a view to extending trade and development with the globalizing process and improvements of education and healthcare are therefore required to achieve higher income and better environmental decisions.
