ABSTRACT

In the article, logistics risks are managed in the logistics service system in relation to the effective coordination of the movement of goods, particularly the transportation and storage of wet fruits and vegetables in warehouses, and the reduction of the negative impact of logistics risks in maintaining the stability of the system to the negative changes brought on by changes in the external environment and the storage of goods based on these considerations, as well as logistical concerns, risk management, and the development of marketing strategies in the activities of commercial entities offering warehousing services, are addressed in the ideal coordination and effectiveness of goods movement..

KEYWORDS: *Commodity Resources, Transportation And Storage Services, Warehousing, Logistic Risk, Seasonality, Coefficient Of Seasonality, Fourier Series.*
