### ABSTRACT

*This article discusses the importance and use of pedagogical technologies in teaching Russian language in primary grades today. Recommendations are made about interactive methods in the educational process and the competence that the teacher should have in its implementation. Today, our teachers organize lessons based on traditional and non-traditional forms of education. Today, our main task is to educate students on the basis of DTS to be free thinkers in all aspects, able to fully express their independent opinions. A variety of methods in pedagogical technologies will increase the effectiveness of the lesson so that students do not get bored.*

**KEYWORDS:** *Russian Language, Pedagogical Technologies, Educational Process, Competence, Innovation, Method, Educational Content.*
